DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I drawn to using BST as the capacitor dielectric layer. It appears that claim 63 reads on this embodiment.

Species II drawn to using Ta₂O₅ as the capacitor dielectric layer. It appears that claim 64 reads on this embodiment.

Species III drawn to using the precursor comprises silane. It appears that claim 65 reads on this embodiment.

Species IV drawn to using the precursor comprises chlorosilane. It appears that claim 66 reads on this embodiment.

Species V drawn to using the precursor consisting essentially of silane. It appears that claims 67 and 68 read on this embodiment.

Species VI drawn to selectively deposit the polysilicon without/void plasma. It appears that claim 70 reads on this embodiment.

Species VII drawn to selectively deposit the polysilicon without/void gas comprising a conductivity enhancing dopant. It appears that claim 71 reads on this embodiment.

Art Unit: 2813

Species VIII drawn to selectively deposit the polysilicon with a gas comprising a conductivity enhancing dopant. It appears that claim 72 reads on this embodiment.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 60 is generic.

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

4. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2813

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Chen whose telephone number is (703) 308-5838. The examiner can normally be reached on Monday-Friday (alternate Monday off) from 8:30 am to 6:00 pm.
